New Office Location

We are , temporarily, moving our offices to a new address as we prepare the new location further north on highway 13. Starting now, 157 Valley View will be our mailing and shipping address for the next year or so. We will still be working on tubs at the old hwy 13 ranch as we work on the buildings at the next ranch up the road. Phone & fax numbers as well as website and e-mail address will stay the same throughout the complete transition, so, please contact us by these means to set up any delivery or pick-up directions.

Please let us help you prevent large problems by checking for pump seal leaks, keeping your filter and safety suction cover clean as well as shocking and adding softrise to your water weekly. We will be changing out pump seal kits at a couple different locations to help you replace them every 2 years to prevent any damage to the pump. Hair or debris (through suction intakes) can shorten pump seal life as will lack of adequate ph and alkalinity in your tub water. Adding softrise each and every week will keep the ph and alk. up (and acid down) to prevent damage to the seals, gaskets and liner vinyl. If your liner becomes wrinkled and brittle, we can help you replace it with new, and then help you maintain that new pliable inner liner with proper water treatment.

Let us know if we can mail you a water treatment guide and/or answer any questions you may have to help keep your softspa like new with the right water and filter maintenance. Also, our web store should help you keep stocked.

Product Specials

Now through August 31, 2008 we are offering you 'Essentials' products at **15% off all orders over \$50.** with **free shipping** on orders over \$100.00. Plus we have, again specially priced our Splashtubs at \$2195. for the st-230 and \$2895. for the new st-315 II.
